### Personal Statement

I have 4 years experience in the animation industry, and am a very capable and adaptable artist. My modeling and texturing skills range from props and environments, to full characters, and I am equally comfortable working on both stylised and photo-realistic models. Each new model brings new challenges and I see this career as a constant education and realise that there's always something new to learn. I find continuing enjoyment in interpreting designs and translating them into 3D and also do personal work in my spare time.

The projects I have worked on over the years have varied enormously, from smaller jobs where turnover is tight, to larger scale productions where I've had the luxury of unleashing my inner perfectionist. I am able to work both remotely and also to travel further afield for the right job.
